Inspiration and Design Concept

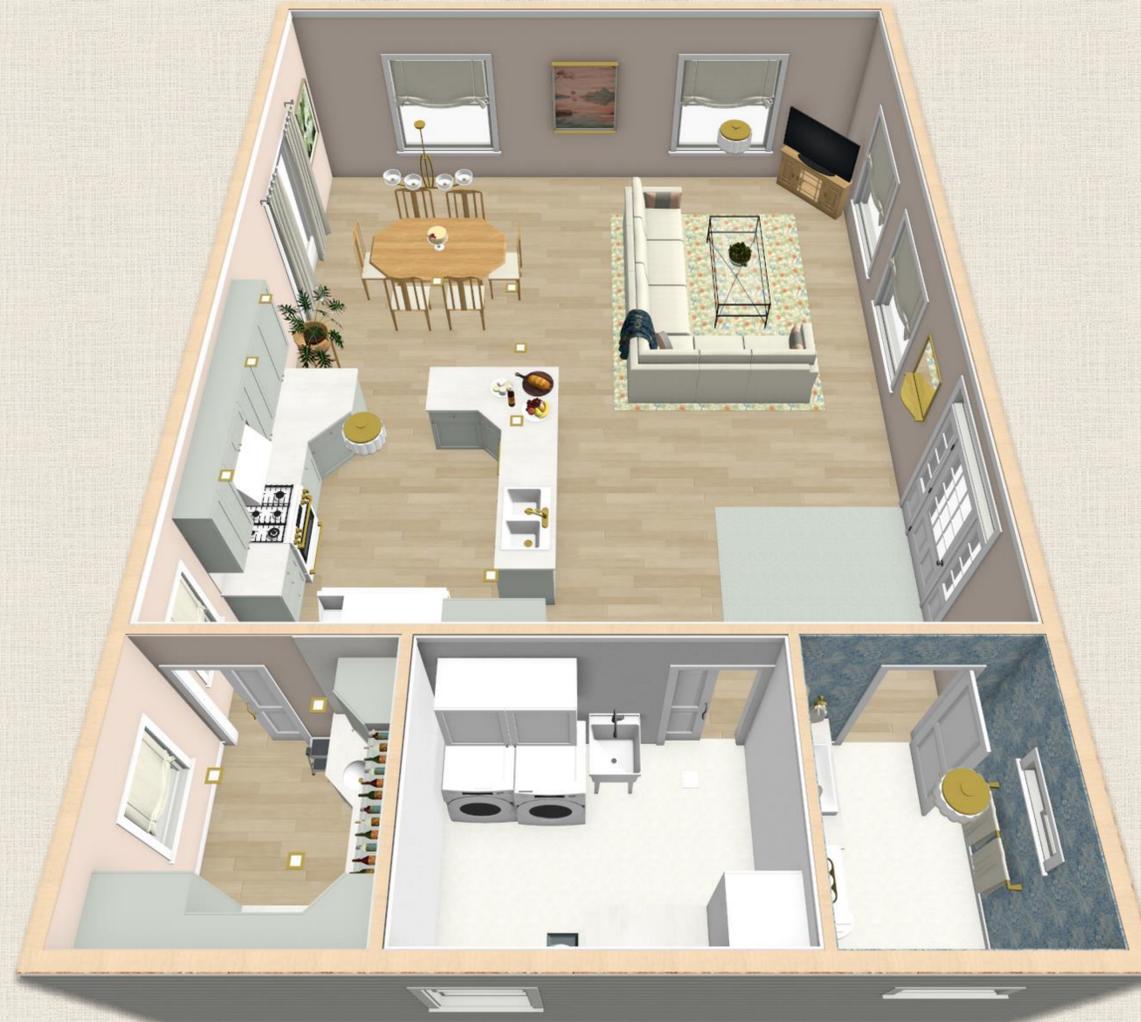

This design embodies a warm, transitional aesthetic with clean *lines* and soft pastel *colors* that create a welcoming atmosphere, while reflecting the client's personality. The heart of the home is an open concept living area which is *unified* by 5" maple hardwood flooring and furniture with natural finishes. The kitchen features stylish GE Café Series appliances and an extra-large True refrigerator, perfect for frequent entertaining. The textured Dekton countertops and backsplashes by Cosentino found throughout the home are durable and will remain beautiful for years to come. While modern in design, tactile *texture* found in the tulip-style Roman shades and area rugs lend a sense of warmth and coziness. Naturalistic *patterns* reflect the client's love of nature. Natural *light* is *emphasized* through strategically placed windows and Sherwin-Williams paints with good reflectance values. The front door features sidelights and a transom window allowing for maximum daylight and serving as a *focal point* in the entry area. The powder room features an elegant patterned wallcovering and gold fixtures elevating the small space. Cabinetry style, luminaires, and polished gold finishes are *repeated* throughout the home creating a sense of *harmony* from room to room. This interior design concept combines functionality and style, creating an inviting environment that caters to the client's passion for cooking and entertaining and where cherished friendships and memories can flourish.
