

Laundry Room Drama

This laundry room design was created for a real client who wanted a space reminiscent of a dramatic powder bath in their new build home. Stick built custom cabinetry would be found throughout the home, so custom cabinets and storage options that wouldn't break the bank were included in this design including a work surface for folding and a hanging rod to dry and store clothing. Bold wallpaper was placed in the largest north and south walls while the east and west walls were painted in the same deep blue color as the cabinets as not to overwhelm the room. Giving the laundry room this dramatic feel offered dazzle to one of the most mundane rooms in the home.
